## WORK EXPERIENCE

- 6 months experience (Jan 2019- Jun 2019) as a Software Intern in Innotical Solutions Pvt. Ltd
- 1 Year experience as an Assistant Software Developer in TradeIndia.

## PROJECTS

### Challenge App

- The app is for IOS and Android devices. The main aim of this app is to motivate people for their fitness. Our role here was to develop API's which cover all the back-end functionalities like login, logout, sending challenges, maintain attendance, calculate winners etc. For API's building, I used Django Rest Frameworks. The API's were based on viewsets and routers. I also used some modules like oauth2 and celery as per the requirements.

### Jobs Portal

- This project is based on **Django MVT Pattern**. Here we are managing the jobs, available across different cities in a country and update the portal regularly so that jobs seeker easily get's the details and venue of jobs which they want. The jobs are categorized under different sections so that user can easily checks the required fields which he/she looking for.

### Lohia App

- The app is for IOS and Android devices. The services provided by this app is to book cab for ride and parcel delivery across different cities in India. In this project my role is to develop Api's for Admin Panel which covers login, logout for admin, records the data for parcels and rides, generate coupons, add vehicles, add drivers/runners, calculate total earnings etc.

### TradeIndia

- One years of experience in analysis design, development and Implementation of various e-commerce and B2B applications, Internet web applications, Database, and Client - Server Architecture using Python/Django, JavaScript, HTML, CSS , Bootstrap, technologies spanning the entire Software Development Life Cycle.
- Hands on experience in writing map-reduce programs in Python.
- Hands on experience in writing, optimizing & debugging stored procedures, functions, views and troubleshooting database issues.
- Experience on Unix/Linux command using SSH Expert in developing Object-Oriented Web applications using MVT architecture.
- Strong background in a disciplined software development life cycle (SDLC) process and has excellent analytical, programming and problem solving skills.
- Use of Subversion tools to coordinate with team-development.
- Experience with Git.
- Worked with database like PostgreSQL , and daily maintenance of it.
- Worked on multiple cross platform of Python like Pycharm, Jupyter, Atom, Visual Studio Code and even worked using command prompt.

#### AWARDS AND ACHIEVEMENTS
